A Small Multi-File Document

Folio Test

September 21, 2026

1 Overview

This document is split into several files so that SyncTeX has to record more than one input. The main file holds the title, this overview and the final remarks, while the chapters live in their own directory.

2 Introduction

The introduction explains the motivation. It spans a few sentences so that the paragraph is typeset over several lines of the page, which makes forward and inverse search interesting to test.

A second paragraph follows, with an enumerated list:

1. first item with some text,
2. second item with a little more text than the first,
3. third item.

$$\int_0^1 x^2 \, dx = \frac{1}{3} \tag{1}$$

3 Results

Table 1 lists the numbers and Equation (1) the formula.

Method	Score	Time
Alpha	0.91	12
Beta	0.87	9

Table 1: Some results.

3.1 Second page

Text on the second page, to have more than one sheet in the SyncTeX file. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

4 Final remarks

Short closing paragraph with an inline formula $a^2 + b^2 = c^2$ and some more words to fill the line so that it wraps onto a second line of output in the PDF.
